

Information Security Policy

Organization: Tenant A

Purpose

This policy defines basic information security responsibilities for employees and contractors.

Passwords

Employees must use strong passwords and must not share passwords with colleagues or external parties.

Access Control

Access to company systems is granted according to job responsibilities. Users must only access information required for their work.

Incident Reporting

Employees must report suspected phishing, malware, or unauthorized access to the security team.

Device Security

Company laptops must use approved security controls and should be locked when unattended.

Management Authority

The Security Team may suspend access when a credible security incident requires immediate containment.
